Adrian Gee (Ed.)

Cell Therapy

cGMP Facilities and Manufacturing

- Fully updated and expanded second edition reflects all recent developments and changes in the field
- Comprehensive coverage of essential information from ethical considerations and facility management to product tracing and labeling, staff training and much more
- Covers other essential topics like quality management, professional standards, writing/maintaining Standard Operating Procedures, financial considerations for academic facilities, future directions, etc

This new edition presents a fully-updated and expanded look at current Good Manufacturing Practice (cGMP) for cell therapy products. It provides a complete discussion of facility design and operation including details specific to cord blood banking, cell processing, vector production and qualification of a new facility. Several chapters cover facility infrastructure including cleaning and maintenance, vendor qualification, writing a Standard Operating Procedure, staff training, and process validation. The detailed and invaluable product information covers topics like labelling, release and administration, transportation and shipment, et al. Further chapters cover relevant topics like writing and maintaining investigational new drug applications, support opportunities in North America and the European Union, commercial cell processing and quality testing services, and financial considerations for academic GMP facilities. A chapter on future directions rounds out Cell Therapy: cGMP Facilities and Manufacturing making it essential reading for any cell therapy professional involved in the development, use, or management of this type of facility.
